

Scott Chiang

Irvine, CA 92618 | scottchiang7@gmail.com | (949) 686-7304 | <https://www.linkedin.com/in/chiangscott/>

EDUCATION

Data Science, AS-T

April 2026 - Present

Irvine Valley College

3.92/4.0 | Honors Program

PROFESSIONAL EXPERIENCE

Robotics Engineering Intern

May 2026 - Present

RobotX AI Inc.

- Operated and programmed Agibot & Unitree humanoid & quadrupedal robots using Python/ROS2/C++, created robot demos for clients
- created interfaces and QOL apps, leading to a 3000% productivity increase
- Created a block coding interface and designed a robotics course from scratch

STEM Instructor

March 2026 - Present

Coding Minds Inc.

- Working with K-12 students, teaching them STEM concepts at ranging skill levels

LEADERSHIP EXPERIENCE

Founding Organizer, Scrapyard

August 2024 - April 2025

Hack Club

- Came up with an event concept and pitched it to Hack Club raising over \$100,000+
- Organized a team to help with managing 60+ events around the world, and managed 12+ events running around the world, garnering 4,000+ active participants
- Ran a hardware bar, created custom PCB badges, and helped with logistics

Founder & Director, Hacky Holidays

November 2024 - March 2025

Hack Club

- Brought an educational grant program from idea to reality, raising over \$2000+ and engaging with 300+ students partnering with Hack Club
- Created a guide to teach people how to use PCB software and make their own circuit boards, held workshops to help people with their designs

PERSONAL PROJECTS

VSLAM Robot

March 2026 - Present

Robot for Mapping & Traversing Spaces

- Interfacing ROS2 with the Jetson Orin Nano for edge computing
- Utilizes an Arduino car base, USB Camera, and IMU for localization and tracking

Quadruped Robot

February 2022 - Present

Cost-effective Miniature Robot Dog for Learning

- Iterated over 4 physical prototypes utilizing CAD and 3D printing
- Created a custom PCB to minimize size, utilizing an ESP32S3 and other SMD chips for tracking & motor driving. Soldered with a hotplate in my garage & runs on a custom Arduino library

SKILLS

Programming Languages: Python, Java, C++, HTML, JavaScript, CSS

Tools & Frameworks: EasyEDA, Fusion 360, Arduino, Git, ROS2, Linux
